# Origins of the Chilean horse

The Chilean breed horse has been declared a Natural Monument. Although its origins date back to 1540, it was not until 1893 when the National Society of Agriculture officially inaugurated the only Genealogical Registry of the Chilean Horse that exists in the country, the only one in America and one of the oldest in the world.

The strength, verve and endurance of the Chilean horse is given by geography. The horse is cowboy, not very tall (height of a pony), thick neck and robust chest. It does not need special fodder during the crossings, and it can easily graze in the places that it travels together with travelers who enjoy its company.
